is an international quarterly journal publishing papers of general interest from all areas of paleontology. Since its founding by Roman Kozłowski in 1956, various currents of modern paleontology have been represented in the contents of the journal, especially those rooted in biologically oriented paleontology, an area he helped establish.

In-depth studies of all kinds of fossils, of the mode of life of ancient organisms and structure of their skeletons are welcome, as those offering stratigraphically ordered evidence of evolution. Work on vertebrates and applications of fossil evidence to developmental studies, both ontogeny and astogeny of clonal organisms, have a long tradition in our journal. Evolution of the biosphere and its ecosystems, as inferred from geochemical evidence, has also been the focus of studies published in the journal.

The language of the journal is English. Submissions may be in the form of articles, brief reports, discussions, or paper/book reviews. Papers are evaluated on the originality of data, interpretations, and ideas, and on the degree to which their findings can be generalized. All papers are subject to peer reviews. Articles accepted for publication are usually published in order of submission. Exceptions are made for papers of particular scientific significance, and for manuscripts which fully comply with editorial requirements given in the instruction for authors and require only minor changes.

Acta Palaeontologica Polonica is indexed in Biological Abstracts, Current Contents/Social and Behavioral Sciences, Physical, Chemical and Earth Sciences, GeoArchive, Geological Abstracts, GeoRef, Contents-Agric. & Biol. Sci., Referativnyi Zhurnal, Research Alert, Science Citation Index Expanded, and Social Scisearch.

Impact Factor (IF) of Acta Palaeontologica Polonica is invariably high; the latest data (2008) gives the journal the 15th position out of 40 periodicals ranked in the Paleontology BYTES report]. Some papers published in Acta Palaeontologica Polonica make a significant contribution to paleontology as recently indicated by Essential Science Indicators [see ESI notification for papers published in Acta Palaeontologica Polonica 1996-2008].

Acta Palaeontologica Polonica is an open access journal which follows the guidelines of the **DOAJ**. Acta Palaeontologica Polonica is a member of [CrossRef](#) and [BioOne](#) consortia.

EDITOR'S NOTE

Beginning with volume VI of „Acta Geologica Polonica” a change will be introduced into the topical scope of our quarterly. It will now publish papers on geological subjects only. Papers dealing with palaeontology will appear in „Acta Palaeontologica Polonica“. This is another quarterly of the Geological Committee of the Polish Academy of Sciences in Warsaw, to be started with the year 1956.

APP: INICJATYWA ODDOLNA - MOTYWACJE

- There is no obligatory page charge for papers up to 8 printed pages (approximately 24 double-spaced manuscript pages, 12 points font; assuming no illustrations), although any financial support for publication is welcome. [10 stron od 2010]
- For longer papers, a page charge of EUR 27 (VAT not included) will be requested for each page over the 8 free pages.
- Authors pay the full cost for the reproduction of color artwork at a rate of EUR 82 (VAT not included) per figure (up to full page size).

Transfer of Copyright Agreement

I, the undersigned, declare that the article accepted for publication in *Acta Palaeontologica Polonica*

Title:

Authors:

is original, and that I (as author or co-author) hold exclusive copyright of the material. I hereby transfer exclusive copyright for this material to the Institute of Paleobiology, Polish Academy of Sciences.

The following rights are reserved by the author(s):

(1) The right to use, free of charge, all or part of this article in future works of their own, such as books and lectures, giving reference to the original place of publication and copyright holding.

(2) Authors may include a copy of their article on their Web page as long as it is clearly noted that the Institute of Paleobiology, Polish Academy of Sciences, owns the copyright and that use for profit is not allowed. This version must be identical to the final published version, and should include a link to the Institute of Paleobiology, Polish Academy of Sciences web site (<http://www.paleo.pan.pl>)

(3) Electronic or print copies may be made for non-commercial personal or classroom use. In cases of classroom copies, copyright should be attributed to Institute of Paleobiology, Polish Academy of Sciences, on each copy.

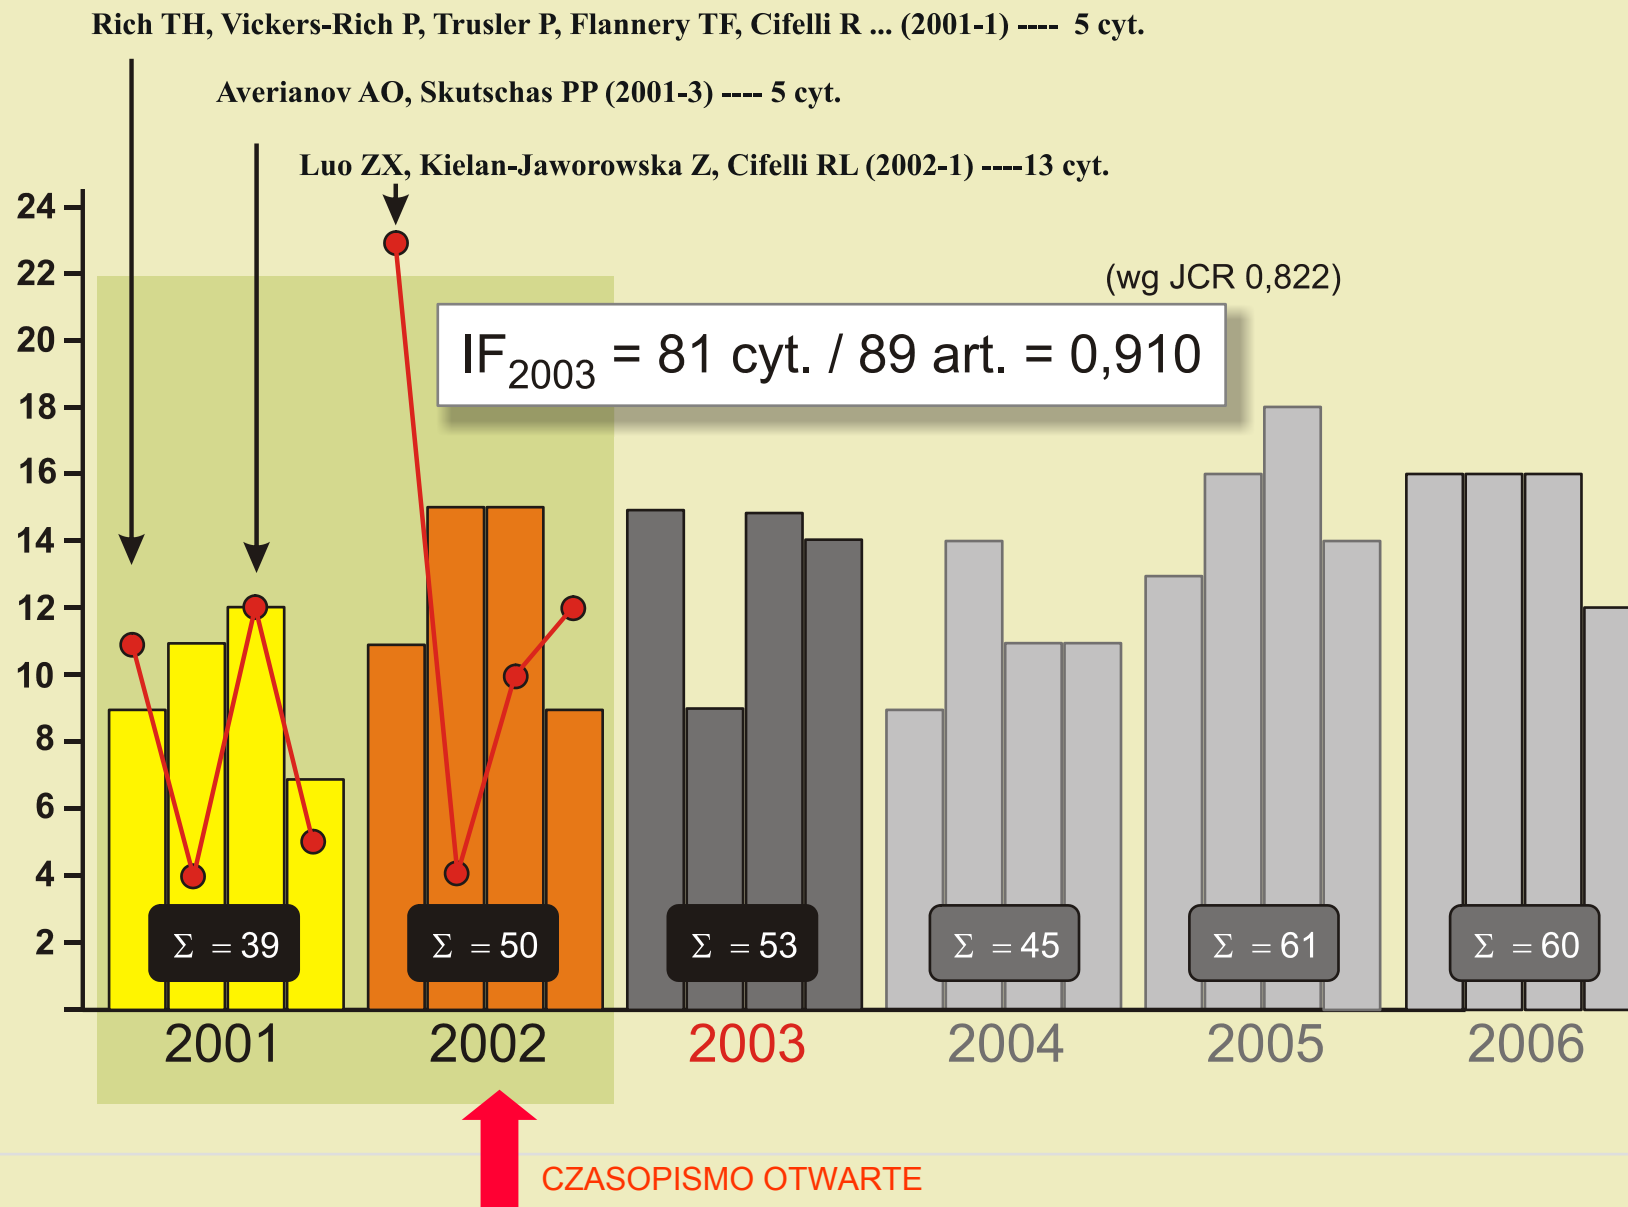

Standardem są opisowe prace paleontologiczne (opis materiału – SPECJALNOŚĆ APP) które wraz z ilustracjami zajmują więcej niż 10 stron druku. RÓŻNORODNOŚĆ publikacji zapewnia finansowanie.
