

INTRODUCTION

This volumine contains papers, which have been presented by foreign and Polish professors during the conference, organized by The Financial Law and the Law of Management of National Economy Chair in Arturówek, 12–14 September 1989. All taken up problems aroused a wide discussion, in which took part representatives of Finances and Financial Law Chairs from different Polish scientific centres. Passing this volumine to the Readers we hope that considering the immediate interest of taken up problems and the essential value of presented papers it would appear to be a good material for further discussions and researches.
